

# P.ET.G Sheets

CLEAR PETG Sheet is manufactured by the extrusion process. The material exhibits excellent clarity, high impact resistance, good transparency and excellent thermoformability.

Typical sheet applications include Screen printing, Signage, POS Displays & Industrial guards.

## TYPICAL PROPERTIES

- Light transmission of 87% - 91%
- Excellent inherent impact strength and toughness
- Outstanding printability
- Maintenance of high rigidity at elevated temperatures
- No pre-drying for processing
- Excellent dimensional stability
- Low water absorption
- SPECIFIC GRAVITY (S.G.) 1.27

## UV RESISTANCE

Is not recommended for external use. There are some grades that are available that are UV treated.

## COLOUR RANGE

Clear only

## SHEET THICKNESS

0.5, 0.75, 1.0, 1.5, 2.0, 3.0 mm

## SHEET SIZE

In all thickness the sheet size is 1220 X 2440mm (8 X 4 Ft.)

In most instances there are no over size sheets on some of the range
